

Instructions for Brainstem Evoked Response Audiometry (BSER)

Dr. _____ has scheduled you to have a specialized test called Brainstem Evoked Response Audiometry (BSER). This test will provide more information regarding your problem so that your Doctor may advise you further about treatment or further testing.

The BSER is done with small sensors taped to your head so that we can pick up your brain waves. A computer presents fast clicking sounds to each ear. The responses from each ear will be analyzed and the results will be calculated.

Your test is scheduled for:

DAY: _____ DATE: _____

At the _____ Office.

At _____ A.M./P.M.

Your appointment is with _____

The test takes about 1 to 1-1/2 hours and you will get to relax or sleep in a reclining chair in one of our quiet rooms. Your eyes will be closed, so please don't wear contact lenses. Please be prepared to pay for the testing or bring your completed health insurance forms with you.

Ladies, no makeup please.

IF YOU ARE UNABLE TO KEEP YOUR APPOINTMENT PLEASE LET US KNOW 48 HOURS IN ADVANCE
